

PRODUCT OVERVIEW: MICOR FLASH SUPPRESSOR

Micor Industries has taken muzzle flash reduction technology to new heights with its full line of flash suppressors. Rugged enough for combat conditions, but still manufactured to the exacting standards required by precision shooters, Micor's flash suppressor improves accuracy, reduces muzzle climb and suppresses flash to nominal levels.

Micor's flash suppression design employs a series of helical slots that match the twist rate of the attached rifle. For combat applications, the Micor flash suppressor accepts optional blank firing adapters or noise suppressors currently used by U.S. military forces. Flash suppressors are also available in machined titanium for extreme conditions.

PRODUCT BENEFITS:

- Improves accuracy
- Reduces muzzle climb
- Suppresses muzzle flash

TWIST RATES AVAILABLE:

- 1:7
- 1:8
- 1:9
- 1:10 (upon demand)

COMPATIBLE CALIBERS:

- .223
- .30 (upon demand)

MATERIAL & FINISH:

- 4140 Alloy and Titanium
- Melonite coating
- Hardness: 28 - 32 RC
- Tensile: 131,000 - 146,000

AVAILABILITY:

- Brownell's: 1-800-741-0015
- www.brownells.com
- Part #100-004-354
(1:9 twist rate/4140 Alloy Steel)

PRICING:

- MSRP: \$59.95 (4140 Alloy Steel)
- MSRP: \$89.95 (Titanium)
- Wholesale: Contact Micor
